# THE FRENCH SCHOOL IN WARSAW

## AN INTERNATIONAL SCHOOL

The French School in Warsaw (Lycée Français de Varsovie - LFV) founded in 1919, is an international educational institution which offers the French national curriculum for **more than 700 students from 45 countries**.

It is the only school in Poland accredited by the French Ministry of Education. LFV is part of the **worldwide educational network** managed by the (Agence pour l'enseignement français à l'étranger - AEFE) which associates 580 French schools all over the world.

Being part of this network allows all students from the French School in Warsaw to pursue their school education in another French school abroad, without any break in their curriculum.

## A SECULAR AND CIVIC EDUCATION

Academic excellence is a goal we have for all our students, and we aim for it with kindness and care, so our alumni can take control of their lives in an ever-changing world.

**French school education** is secular. No religious class is offered at the school and the curriculum focuses on **transmitting civic and moral values**, while respecting the diversity of religious beliefs.

The teaching staff of the French school in Warsaw organizes many school trips and various educational projects in order to help children maintain contact with the Polish language and culture, but also discover French traditions, and make them more aware of the need to protect the environment and respect people from other cultures.

## DEEPENING KNOWLEDGE AND LEARNING NEW SKILLS

The four-year middle school is the first stage of a two-tier secondary education. At this stage, students consolidate and deepen the knowledge they have acquired in various subjects (foreign languages, sciences, history, geography, fine arts and sports).

At the end of middle school, students graduate with the **Diplôme National du Brevet (DNB)**, which certifies the completion of the first level in secondary education. The pass rate for this exam has been 100% for years.

In science classes, the emphasis is put on the **investigation process** itself in order to develop students' creativity, stimulate their critical sense, and arouse their curiosity as well as **interest in scientific and technological progress**.

### MAIN AREAS OF THE CURRICULUM:

- using languages to think and communicate;
- methods and tools to learn effectively;
- becoming a committed citizen;
- natural systems and the technical world;
- representations of the world and human activity.
